CSS Essential Training

## **PROJECTS**

### **care-finder app**

- The purpose of this application is to let users get fast access to the nearest hospital close to them.
- The application is built with Vue.js, Vuex and Firebase.
- Unit and component testing.
- The project is still in progress.

### **chat-app**

- The application is built with react js. It is an application that allows communication between parties of any kind.

### **crime-location-map**

- The application is built with react js. It is an application that allows you to see where crimes are committed in different areas on the map and what crime that occurred when you click on the crime-scene icon..

### Resort

- The purpose of this application is to build my React knowledge..

### Note-take-in-app

- This application helps users track their daily activities.
- The app is built with Vue.js and Vuex for state management.

### Youtube

- Youtube clone built with HTML and CSS and Vue.js to build it.

### Game

- This is a game I built where you guess the number to be displayed on the screen.
- I used HTML, CSS and Javascript to get it done.

### Ai marketing-app

- The purpose of this project is to help business owners to generate persuasive marketing strategies, giving potential customers hints concerning your product and the pleasure and benefit they will get from the products. What the producer will do is to input the name of the product, make a description and your audience and the AI will generate convincing words to get you some buyers.
- The application is built with Vue.js.
- The application makes use of the OpenAi api.

### my-gpt

- This application is a web app that is a bit similar to the real chatgpt, where you get to ask anything and it gets you an answer.
- The application is built with on Vue.js.
- The application makes use of the OpenAi api.

### Dribbble

- This is a website where one can easily get website(s) to emulate but which I actually emulated the website itself.
- I built the website with Vue.js.

### Quiz

- This is a quiz that allows you to pick between 3 subjects and the one you prefer to attempt.
- The quiz project also has the filter feature.
- This very project is built with Vue.js.

- This quiz app is also responsive.

## **SKILLS & TECHNOLOGIES**

- **Frontend:** Html, CSS, Javascript, VueJs, ReactJs, Git, Firebase.
- **Platform:** Netlify, Slack, GitHub, Stackblitz etc.
